About me

I'm a software engineer with more than 5 years of experience. I have experience with Javascript (and Typescript), Node.js and React.js. I've worked with Express.js, Koa.js and Serverless as Node.js frameworks. I built a lot of websites with Next.js and others with Nuxt.js. Also I've worked with AWS products as DynamoDB, SQS, EC2 and S3. In my first years of work, I worked with PHP (Laravel framework) and Vue.js. I like to work with Notion, Jira, Slack, Visual Code Studio, GitHub, Postman to help me to work better.

Work Experience

Encora

Peru

Senior Software Engineer

Dec 2022 - current

- I'm working for client GoDaddy. In my team, we focus on improving the web design and functionalities of the Conversations's Web. It's a GoDaddy's product based on connecting with different social networks to have a single communication channel for companies
- Technical Skills:** TypeScript, JavaScript, React.js, Next.js

Seeri

Latin America

Software Engineer

Nov 2021 - Aug 2022

- I worked on a project called Seeri App. It is a general template for e-commerce projects that manage the products of the different brands that are suppliers to the client. There is a shopping cart. We are integrated with product shipping options. In addition, we have different payment method options for Mexico and Colombia.
- I worked on a project called Seeri Backoffice. It is a platform to manage sellers, suppliers, administrators, roles, products, and coupons. You can create, edit, view, and delete each element of the web. You can configure taxes, offers, categories, keywords, and attributes of each product.
- Technical Skills:** TypeScript, JavaScript, Node.js, React.js, Next.js, TailwindCSS, React Admin, Material UI, Cloud Firestore

Indra

Lima, Peru

Software Developer

Nov 2020 - Nov 2021

- I worked on a project called Rimac App Mundo which is a mobile application that helps Rimac clients to buy their vehicle and health insurance policy. The integration is based on microservices. The AWS infrastructure was used for the development of the project.
- I worked on a project called Rimac Web Salesforce. It is a web project that has integrations with Salesforce. The project is based on creating support tickets and reporting to those involved. In addition, the integrations were developed with microservices on AWS.
- Technical Skills:** JavaScript, TypeScript, Node.js, React.js, Serverless Framework, AWS Lambda, Amazon DynamoDB, Amazon Cognito

Universidad Tecnologica del Peru - UTP

Lima, Peru

Software Developer

Feb 2020 - Nov 2021

- I worked on a project called Horacio. It is a website where university students can manage their schedule face-to-face and virtual, considering the schedules of professors, courses, and university premises.
- Technical Skills:** JavaScript, Node.js, Vue.js, Nest.js, Nuxt.js, TailwindCSS, PHP, MongoDB, MySQL, Oracle.

Joinnus

Lima, Peru

Full Stack Developer

Jan 2019 - Jan 2020

- I worked on a project called Joinnus Web. The website manages the purchase of tickets for massive and small events. Different payment methods were integrated for Peru, Colombia, and Ecuador. In addition, there are benefits in each purchase of tickets for the events.
- I worked on a project called Joinnus Cashless. The cashless system is complementary to the purchase of tickets on the Joinnus web platform. This allowed the user to use points recharged on the web, within the event to purchase products without having to pay by card or cash.
- Technical Skills:** JavaScript, Node.js, Vue.js, MongoDB, PHP, Laravel, Amazon SQS, MySQL, Bootstrap

Mandü

Lima, Peru

Full Stack Developer

Aug 2018 - Nov 2018

- I worked on a project called Mandü Performance. This project was a website where data is filled in by companies and their employees to have metrics that help improve the company's work environment. In addition, feedback was provided based on employee performance scores.
- Technical Skills:** JavaScript, PHP, Laravel, React.js, MySQL

Prodequa

Lima, Peru

Full Stack Developer

Apr 2016 - May 2018

- I worked on a project called Isee Glasses. It is an ecommerce platform where you can buy glasses using technology that allows you to virtually try the glasses through the webcam. In addition, the lenses can be personalized. A payment gateway with Peruvian soles and dollars was integrated.
- Technical Skills:** JavaScript, PHP, Laravel, Vue.js, MySQL, Node.js, Express.js, MongoDB, Bootstrap

Education
